JOUINI SARRA

BI & DATA SCIENTIST | MACHINE LEARNING | GENAI & RAG

Jouini.sarra@esprit.tn
+216 28856585
Tunis

PROFILE

Junior BI & Data Scientist with a Computer Science engineering degree specialized in Business Intelligence, with hands-on experience in machine learning, explainable AI (SHAP, LIME) and generative AI (LLMs, RAG assistants) applied to credit risk and decision support. Comfortable translating business problems into data and ML solutions, with a solid Python and SQL base and a rigorous, autonomous way of working. Currently a Technical-Functional Consultant in a financial-services environment, collaborating with business and technical teams.

WORK EXPERIENCE

Sept. 2025 - Currently
Tunis

Technical-Functional Consultant | BI & Data - Teamwill Consulting

Client: Crédit Agricole Leasing & Factoring — CBM Platform Project (financial services)

- Gather and analyze business needs directly with financial-services stakeholders on the CBM platform, a renovation of the middle-office critical applications (DE, E-lease, BT Référentiel Tiers, SAFIRE, SAS EKIP, Fiche Technique).
- Write User Stories and functional specifications that translate client requirements into deliverables the technical teams can build.
- Take part in User Acceptance Testing (UAT) sessions, reviewing deliverables with business users for clarity and accuracy before go-live.

Sept. 2025 - Currently
Tunis

BI & Data Scientist – Credit Risk - Teamwill Consulting

- Developed machine-learning models for credit risk prediction, using credit application and customer behavioral data.
- Integrated explainable AI (SHAP, LIME) to make model outputs transparent and support credit decisions.
- Designed a RAG-based assistant powered by an LLM to help users query and understand credit-risk information and decision explanations.
- Built the data foundation for the models: data pipelines with Talend and SQL Server, and a structured data warehouse.
- Developed Power BI dashboards to monitor credit risk indicators and communicate model results to business users.

Jan. 2025 – June 2025
Tunis

BI / Data Scientist – Reducing CO2 Emissions in the Agro-Food Industry - ESPRIT

- Designed Power BI dashboards to make CO2 emissions data clear and actionable for non-technical stakeholders.
- Collected and processed the underlying emissions data using Python and Talend.
- Proposed eco-friendly strategies (waste reduction, energy efficiency) based on dashboard findings.
- Designed a decision-recommendation assistant that turns the analysis results into suggested actions for decision-makers.
- Monitored the impact of implemented solutions through the same reporting.

Feb. 2023 - June 2023
Tunis

Computer Vision Developer – Object Recognition Solution for Industrial Applications - All Circuit

- Developed a web application for detecting industrial objects.
- Integrated a Raspberry Pi camera for capturing and analyzing images.
- Implemented a recognition algorithm for testing LCD screens.
- Conducted real-world testing to validate system reliability.

EDUCATION

2023 - Sept. 2026

Computer Science Engineering, Specializing in Business Intelligence

The Private Higher School of Engineering and Technology — Degree obtained

2020 - 2023 **Bachelor's Degree in Microcomputer Embedded Systems**
Higher Institute of Arts and Multimedia, Manouba

2019 - 2020 **Baccalaureate in Experimental Science**
Amal Secondary School
